19 July 2018 at 12:10

Dear Sir/ Madam,

The "Integrated Technologies Olympiad 2019" is a step towards bridging the gap between demands from industries and existing engineering curriculum. The very nature of the competition will certainly help students to acquire "Learning to Learn" skill, which is utmost important for survival in this industrial world.

InTech Olympiad is entering in its fourth year, and it is an Eight month long event which is designed in a way to bridge the gap between industry and academia through live projects.

A student from any branch, any year of engineering/management/Diploma can participate. There is no restriction on number of students from your Institute, but we expect at least few students from your Institute to reach to finale in the month of February 2019.

The projects are live case studies from industry and the industry mentor will guide the students along with academic mentor. It is a national level initiative, and last year more than 18000 students participated from all the states and Union Territories of India. More details about this initiative can be found on:

Registrations started for the InTech Olympiad 2019

Please ask students of your institutes to register by clicking on link "<https://portal.coepvlab.ac.in/InTechOlympiad/registration>"

or they can go to website

<https://portal.coepvlab.ac.in/InTechOlympiad/>

and click on "Register" button to register.

First trial test will commence on 22nd July and students will be notified through email once they register for the competition.

Please forward as appropriate.
