Spoken Tutorial Course Registration

Dear Students

The Spoken Tutorial project is the initiative of the 'Talk to a Teacher' activity of the National Mission on Education through Information and Communication Technology (ICT), launched by the Ministry of Human Resources and Development, Government of India. The use of spoken tutorials to popularize software learning and its use will be coordinated through this website.

<https://spoken-tutorial.org/>

It is a multi-award-winning educational content portal. Here one can learn various Free and Open Source Software all by oneself. Its self-paced, multi-lingual courses ensure that anybody with a computer and a desire for learning, can learn from any place, at any time and in a language of their choice.

End-of-Course online tests and certificates are available for those who wish to test their expertise in a particular software. These certificates give an edge to students during placement by increasing their employability potential.

The following courses will run this summer for all students.

S. No.	Course	Description
1.	Scilab	Mathematical and scientific calculation software, open source substitute for MATLAB, very useful for all science and engineering students, in academics particularly.
2.	LaTeX	LaTeX is a typesetting software for preparing reports, letters and presentations - especially useful for persons engaged in writing/ publishing documents from science/ arts/ commerce fields. Useful for UG/PG students, faculty and research scholars
3.	Linux	Free operating system, almost neutral to virus attacks and no hassles for licensing issues. UG/PG students and system administrators will greatly benefit by learning to use the Linux OS.
4.	QCAD	QCAD is a free, open source application for computer aided drafting (CAD) in two dimensions (2D). Learn to create technical drawings such as plans for buildings, interiors, mechanical parts or schematics and diagrams using QCAD. Useful for UG/PG architecture students
5.	Python 3.4.3	Numerical computational software for Science and Engineering Education - used in 3D animation and Gaming industry, Artificial Intelligence, YouTube, NASA, CERN, Yahoo and so on. Useful for UG/PG CSE/IT/CS students and CBSE high school students
6.	Arduino	Arduino is open source hardware, software and micro-controller-based kit. It is used for building digital devices and interactive objects that can sense and control physical devices. Useful for High School and UG/PG Electronics students, hardware professional.

Tentative start date of the course is last week of June and certification exam date is last week of August 2019. **There is no examination fee.** Choose one or multiple courses from the list above and fill up the following google form on/before **5th June 2019**.
